THE INVENTION RELATES TO A PROCESS FOR OBTAINING MOUTHWASH FOR PREGNANCY GINGIVITIS, WITH MULTIPLE IMPLICATIONS IN THE HYGIENE OF THE ORAL CAVITY AND FOR THE PREVENTION OF DENTAL CARIES AND THE TREATMENT OF DISEASES OF THE ORAL CAVITY, FOR USE IN THE PHARMACEUTICAL AND COSMETIC INDUSTRIES.

### Advantages:

- has no contraindications, allows use by pregnant women, especially those with symptoms of vomiting, being recommended for the entire period of breastfeeding;
- is indicated for pregnancy gingivitis;
- the association of compatible natural principles that have an immuno-modulatory effect through non-specific mechanisms;
- has a good topical tolerance and does not induce hypersensitivity reactions, being much safer and healthier for the oral cavity;
- has an antiseptic and calming effect on the gums;
- reduces inflammation of the gums and has an astringent and healing effect on them;
- allows the prevention of harmful activity of bacteria and yeasts;• allows the removal of tartar / dental plaque;
- stabilizes the pH values in the oral cavity;
- allows you to keep your breath fresh;
- after rinsing, mouthwash may be swallowed;
- maintains the local oral health, but also the whole body, through harmless and stable components;
- has a pleasant taste.
